

UNDA REX

Living with the sea

J180

New **UNDA REX** mitigation seat **J180** offers unprecedented commotion and protection for professional users.

Anatomically shaped and with continuous height regulation, the **J180** fits occupants of various weights and heights.

Robust mechanism made of marine grade stainless steel is designed to withstand harsh marine conditions with minimum maintenance.

Minimal base footprint allows installation even on smaller boats.

Technical characteristics:

- 180 mm vertical stroke
- Continuously adjustable seating height 725±30 mm
- Adjustable spring preload
- Adjustable shock absorber compression
- Adjustable shock absorber rebound
- Marine grade AISI 316L stainless steel mechanism
- Fibre-reinforced plastic seat shell
- Thick variable density marine grade sponge
- Silvertex™ upholstery
- Custom color on request (Spradling Silvertex™ palette)
- Rear grab handles
- Optional front grab handles
